Description

FRONT END DEVELOPER in AODOCS
PARIS

<https://www.aodocs.com/>

I have been working for a three months project related to AODOcs, a document management solution which runs on the Google Cloud Platform. More precisely, I was involved developing a connector between AODOcs and Gmail. My main job was the GUI developing, this has been done also by using several front-end framework as AngularJS, Bootstrap, Material angular. Furthermore, the main programming languages I have been using in this working experience were JS and Java. The good result it was reached also by using back-end framework as Lombok, Guava and surrounding the whole back-end with JUnit test. The whole project has been done by working in team of 2 to 5 developers

WORK EXPERIENCE

FEB 2015 → NOV 2015

WHERE?

*Company web site**Description*Google cloud platform developer in REVEVOL
PARIS<https://www.aodocs.com/>

During my experience in Revevol I have been in touch with the following programming languages:

- Java
- Javascript

but I also have worked with the following frameworks:

- AngularJS
- JQuery
- Material angular
- Bootstrap

Each project I have worked on was Google cloud platform based.

I have been working with new projects and also with legacy projects.

I have been working in a project related to AODocs that why I have worked in Paris for three months in collaboration with the french revevol team.

WORK EXPERIENCE

FEB 2014 → Feb 2015

WHERE?

*Company web site**Description*Software developer in NAVIONICS
PISAwww.navionics.com

During my work experience in Navionics I kept in touch with the following programming languages to manage and develop new functionalities of a core library witch was the team I was working for:

- C
- C++

I have been worked with the following framework:

- QT

In particular, I had to manage and/or develop old/new features used in a "core library" wrapped for each other platform (mobile/web/embedded system) to provide the application functionalities.

I intensively worked with QT (with and without development tools) to manage (and develop when the legacy application was not up to date with the new functionalities) a desktop application made to test the "core" functionalities before wrap it for each needed platform

Certification

Google cloud platform developer

WHERE? Utrecht
WHEN? June 2015

EDUCATION

2013 → June 2014

Master in computer science

University of Helsinki (FINLAND)

- First year of the Master in computer science
